## **Public Workshops Scheduled to Begin MLPA Initiative South Coast Project**

SACRAMENTO – Workshops are scheduled this month and next to introduce the public to the Marine Life Protection Act (MLPA) Initiative's South Coast Project. The overall goals of the workshops are to orient people to the MLPA Initiative process, specifically in the MLPA South Coast Study Region (state waters from Point Conception in Santa Barbara County south to the California border with Mexico, including offshore islands), generate nominations for a regional stakeholder group, invite questions, and solicit input on the process.

"Our goal is to help the state conserve marine life and habitat by designing a network of marine protected areas along the entire coast of California in order to restore a healthy ocean ecosystem," said Susan Golding, chair of a task force overseeing the planning process. "The public's participation is vital to our ability to do this successfully."

The workshops will use an "open house" format where attendees may choose to visit at any time during the three hours and walk through a number of informational stations. Key information stations include an overview of the MLPA Initiative process and timeline; the status of marine protected areas in California; and how the public can get involved. Staff will be available at each station so that attendees may ask questions and provide feedback.

The first series of workshops are scheduled for:

- **Santa Barbara on Monday, June 23, 2008:** Louise Lowry Davis Recreation Center, 1232 De La Vina St., 805-897-2568
- **Oxnard on Tuesday, June 24, 2008:** South Oxnard Center, 200 E. Bard Road (located next to the South Oxnard Branch Library), 805-385-8362
- **Santa Monica on Wednesday, June 25, 2008:** Ken Edwards Center, 1527 Fourth St., 310-458-8300.

A second set of workshops are scheduled for:

- **Huntington Beach on Tuesday, July 8, 2008:** Huntington Beach Harbor View Club House, 16600 Saybrook Lane, 714-536-5486
- **Carlsbad on Wednesday, July 9:** Hilton Garden Inn, 6450 Carlsbad Boulevard, 760-476-0800
- **San Diego on Thursday, July 10:** Holiday Inn Express Old Town, 3900 Old Town Boulevard, 619-299-7400.

All workshop times are 5:30 to 8:30 p.m.

-more-

“The next phase of the MLPA Initiative will again afford many opportunities for public involvement, which begins with this series of workshops from Santa Barbara to San Diego,” said Executive Director Ken Wiseman. “We’re excited to continue moving forward using an ongoing, transparent, dynamic public process, continually integrating the lessons we learn along the way.”

The MLPA Initiative is a public-private partnership designed to help the State of California implement the MLPA, which was enacted in 1999. The MLPA directs the state to reexamine and redesign California’s system of marine protected areas (MPAs) with the goal of increasing its coherence and effectiveness at protecting the state’s marine life and habitats, marine ecosystems, and marine natural heritage, as well as to improve recreational, educational and study opportunities in marine ecosystems that are subject to minimal human disturbance. MPAs are discrete geographic marine or estuarine areas designed to protect or conserve marine life and habitat.

A regional approach is being used in the MLPA Initiative process, where California’s 1,100-mile coastline has been divided into five study regions. In September of 2007, regulations for the first of the five study regions were implemented for the central coast (Pigeon Point in San Mateo County to Point Conception in Santa Barbara County). In the second study region, four proposals for redesigning MPAs in the north central coast (Alder Creek in Mendocino County to Pigeon Point in San Mateo County) were presented on Wednesday, June 11 to the California Fish and Game Commission at a special meeting in Sacramento. North central coast regulations are expected to be adopted by the commission by the end of the year.

While the commission considers north central coast MPAs, the MLPA Initiative is moving to the south coast study region. After the south coast planning process is completed, the north coast process will begin (Alder Creek north to the California border with Oregon), followed by the San Francisco Bay process (from the Golden Gate Bridge northeast to the Carquinez Bridge). A specific timetable for the remaining study regions has yet to be established.

A blue ribbon task force is overseeing the process and near the end of 2009 will make a final recommendation regarding south coast MPA proposals to the commission.

For additional information about the MLPA Initiative, visit [www.dfg.ca.gov/mlpa](http://www.dfg.ca.gov/mlpa).

# California's Marine Life Protection Act Initiative presents...

## *South Coast Public Open Houses*

Open houses are scheduled to introduce the Marine Life Protection Act (MLPA) Initiative's South Coast Project. The MLPA requires the state to reexamine and redesign California's system of marine protected areas, with extensive public input.

Attendees are welcome to walk through informational stations at their leisure any time between 5:30 and 8:30 p.m. The open house goals are to introduce people to the MLPA Initiative and its South Coast Project (state waters from Point Conception to the California border with Mexico, including offshore islands), invite questions, and solicit input on the process.

***All are welcome to attend. The open houses are all scheduled from 5:30 to 8:30 p.m. Drop by anytime!***

**Tuesday, July 8**

**Huntington Beach**

Huntington Beach Harbor

View Club House

16600 Saybrook Lane

**Wednesday, July 9**

**Carlsbad**

Hilton Garden Inn

6450 Carlsbad Blvd.

**Thursday, July 10**

**San Diego**

Holiday Inn Express

Old Town

3900 Old Town Ave.

The success of the MLPA Initiative is highly dependent upon the active involvement of the public in a variety of ways; the MLPA South Coast Project will afford many opportunities. Come visit an open house to learn how you can get involved! Open houses were also held in June in Santa Barbara, Oxnard and Santa Monica.

***For more information, please contact the MLPA Initiative at 916-654-1885 or visit [www.dfg.ca.gov/mlpa](http://www.dfg.ca.gov/mlpa)***

# California's Marine Life Protection Act Initiative

## South Coast Project (2008-2009)

**What is the Marine Life Protection Act Initiative?** A public-private partnership designed to help the State of California implement the Marine Life Protection Act, using the best readily available science as well as the advice and assistance of scientists, resource managers, experts, stakeholders and members of the public.

**Why this project?** The Marine Life Protection Act was signed into law in 1999 and directs the state to redesign California's system of marine protected areas to increase its coherence and effectiveness in protecting the state's marine life and habitats, marine ecosystems, and marine natural heritage, as well as to improve recreational, educational and study opportunities provided by marine ecosystems.

**What are marine protected areas?** Marine protected areas (MPAs) are named, discrete geographic marine or estuarine areas designed to protect or conserve marine life and habitat. Examples within California that you may be familiar with include Goleta Slough State Marine Park, Painted Cave State Marine Conservation Area, Crystal Cove State Marine Conservation Area and San Elijo Lagoon State Marine Park.

**What can I do in a marine protected area?** There are three types of MPAs: state marine reserve, state marine park, and state marine conservation area, each with different rules about what activities can or cannot be done within each. In general, marine reserves do not allow any type of extractive activities (including fishing or kelp harvesting), marine parks do not allow any commercial extraction, and marine conservation areas do not allow some combination of commercial and/or recreational extraction.

**When and where did the MLPA Initiative start?** Redesigning MPAs along California's 1,100 mile coastline is such a large task that a regional approach is being used to implement the MLPA. In the first phase of the initiative, a master plan framework was created to help guide the planning process within individual geographic areas, called study regions. The central coast study region (from Pigeon Point in San Mateo County to Point Conception in Santa Barbara County) was the first effort to redesign a group of MPAs. In April 2007 the California Fish and Game Commission adopted MPAs for the central coast and is now considering MPAs for the north central coast (from Alder Creek/Point Arena in Mendocino County to Pigeon Point).

**What are the basic steps in the MLPA Initiative process?** An appointed regional stakeholder group makes proposals for MPAs with advice and guidance from other groups and the public; these proposals are reviewed by a science advisory team, and then by a policy level blue ribbon task force that makes recommendations to the California Fish and Game Commission, the decision-making body under MLPA.

**When will the MLPA Initiative be in my area?** The south coast (Point Conception in Santa Barbara County to the California border with Mexico in San Diego County) is the next study region where planning has begun. Following the south coast will be the north coast (California border with Oregon to Alder Creek/Point Arena) and then San Francisco Bay (Golden Gate Bridge northeast to the Carquinez Bridge).

**How do I get involved in the process?** The success of the MLPA Initiative is highly dependent upon the active involvement of stakeholders and the general public in a variety of ways, including a regional stakeholder group, workshops, public meetings, and providing input on documents and MPA proposals as they are developed. The MLPA South Coast Project will afford many opportunities for public involvement, which will begin with a series of workshops in the summer of 2008. For more information visit [www.dfg.ca.gov/mlpa](http://www.dfg.ca.gov/mlpa).
